ARC-164 plug-in LED module: six frequency digits and two preset digits

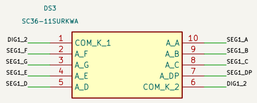

Display drivers, buffering, Teensy and backlight MOSFET are on the Power Driver Board. J20 is a 40-pin display cable.

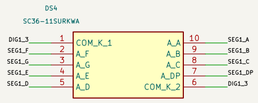

Channel encoder removed from module. J20 contacts 25 and 26 are reserved / not connected.

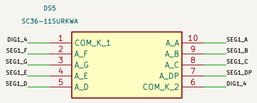

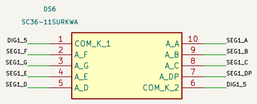

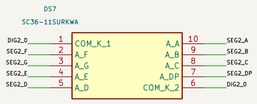

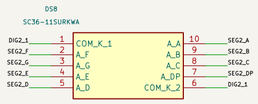

Backlight LEDs and their resistors removed. J20 backlight contacts reserved for future use.

J20 DISPLAY ONLY: 40-pin 2.54mm IDC cable, 6in. Pins 1-32 retain existing assignments; 33-40 NC. Key toward PCB top edge. Label DISPLAY / J20; J10 is CONTROLS. Plain headers are not mechanically keyed.
